Lund, Sweden, June 6th, 2017

FlatFrog's InGlass™ Touch technology is now available for Polycom products

As a technology partner, FlatFrog InGlass™ has been approved as interoperable [partner](#) with Polycom products and applications. FlatFrog InGlass™ interactive technology is qualified to work with complementary software solutions developed by independent software vendors for Polycom.

“We are excited about our engagement with Polycom. It is rewarding to see our touch and pen innovation work adopted on the Polycom platform resulting in great products that enhance the collaboration experience between people and teams” said Dhvani Vyas, CEO of FlatFrog.

About FlatFrog

FlatFrog is revolutionizing the touch industry with its patented InGlass™ touch and pen technology. FlatFrog's products offer a perfect viewing experience, supporting over 100 touches with precision writing, touch-pen-eraser differentiation and multi users capabilities. FlatFrog InGlass™ Touch technology is designed for mass production and integration into 23-200” interactive displays. FlatFrog is based in Lund, Sweden.
