

TeamTablet Flex

– built for interactive collaboration

TeamTablet Flex is an easy-to-install appliance that turns any compatible touchscreen into a plug and play collaboration hub, enabling **video meetings**, built-in **whiteboarding** and wireless interactive **screen sharing** of your laptop — all on a single canvas without any source switching.

FEATURES

Meetings

- Use with existing Teams Rooms, Zoom Rooms, Google Meet, Webex or any other video conference solution
- Control your meeting directly from the touch screen
- Compatible with all Microsoft Teams Rooms certified bars
- HDMI input up to 4K UHD (3840*2160)

Whiteboarding

- Start a whiteboarding session and collaborate seamlessly in real time with both in-room and remote colleagues using the touch screen and your personal devices
- Guests can join ad-hoc through link or QR code without setting up an account
- Load and save boards on your personal cloud connected account
- Seamless integration with any video conferencing solution
- Secure, tenant-based cloud and device administration

Screensharing

- Share your laptop content wirelessly to the touch screen via Miracast and Airplay*
- Interact with the laptop content on the touch screen with zero latency inking.
- Collaborate with any application you have installed on your laptop— no network connection required, as casting is peer-to-peer
- Touchback with up to 16 simultaneous touches
- Pen, finger and palm differentiation with tool support

*Touchback features only possible via Miracast

ESSENTIAL FLEX SETUP

Touchscreen

This is where the action happens. Touch and write directly on the screen. Convert passive observers into active participators. Visualize concepts and bring ideas to life using the whiteboard and annotation tools.

Touchscreens provided by FlatFrog Partners:

- DELL P6524QT (65")
- Other compatible touchscreens

TeamTablet Flex

A powerful computing box that connects with the touchscreen and runs the TeamTablet software, enabling the three meeting essentials: **Join meeting**, **Whiteboard**, and **Screen share**.

Flex turns any compatible touchscreen into a powerful TeamTablet — ideal for collaborative workflows like retrospectives, design sessions, project planning, and creative brainstorming.

Video bar (Optional)

Include remote team members by connecting an All-In-One bar to run video meetings. TeamTablet Flex is fully compliant with Teams Rooms, Zoom Rooms, Google Meet, Webex or any other video conferencing room system.

Suggested video bar brands:

- Logitech
- HP Poly
- Jabra

WHY FLEX FOR INTERACTIVE COLLABORATION?

Walk-up-and-use interactive hub

- Instantly start video meetings, whiteboarding and screensharing sessions
- Combine all three functions on a single canvas
- Eliminate context switching
- Seamlessly include remote participant

Like your whiteboard – but better

- Write naturally with a pen — just like using a marker on a dry-erase board
- Use familiar gestures like swipe, pinch and erase
- Re-arrange sticky notes and images freely without worrying about them falling off

Persistent, sharable and secure

- Save whiteboard sessions and annotations — never lose an idea
- Share instantly with one tap
- Bring any app into the canvas from your laptop securely

TYPICAL USE CASES

Ideation

Effortlessly capture ideas, visualize concepts, and collaborate in real time. The built-in whiteboard is perfect for brainstorming sessions, creative workshops, and turning thoughts into actionable plans.

Retrospectives

Run efficient sessions on the built-in whiteboard. Participants prepare notes on their own devices and post them to the board when ready to share. The host organizes input, and captures action items directly on the board.

Workshops

Drive creative thinking with real-time annotation and instant collaboration on the built-in whiteboard. Ideal for design sprints, strategy alignment, technical planning, or cross-functional workshops that move ideas into action.

Kanban

Visualize progress across teams with interactive Kanban boards. Easily track tasks and workflows — ideal for hybrid or fully in-office teams.

Sprint planning

Align faster with your team using visual sprint planning tools. Everyone contributes on the same canvas, no matter where they're located.

Hybrid work

With TeamTablet Flex, hybrid feels local. All participants interact on the board as if they're in the same room
