

## Software Engineer – Applications

### The company

FlatFrog is a pioneer technology provider for interactive large displays (55" and larger). We are revolutionizing the corporate conference rooms and school classrooms around the world with our high-performance patented InGlass™ technology. Our customers are large international brands that sell complete displays and products into corporate and education markets. FlatFrog develops, from ground-up, both software and hardware made for large volume production and is headquartered in Lund, Sweden with offices in US and Asia.

### About the work

The applications team at FlatFrog is a cross functional group of highly-skilled software engineers on a mission to create the perfect collaboration experience enabled by network connected large interactive displays in the next generation conference and huddle rooms. Our application development spans native clients on Windows 10, Android and iOS, web clients in modern browsers as well as cloud based backend servers. Building on FlatFrog's high-performance pen and touch technology, we always strive to provide the most naturally intuitive writing and interaction experience. We are now looking for a skilled software engineer to join our team in Lund, Sweden.

As part of the applications team you will contribute on all levels in the design and implementation of software in our clients and servers. You will take lead on a connected digital whiteboard client in an embedded Android environment, but will also help with system design and implementation in clients on other platforms as well as the backend servers.

### Your profile

You have a Master degree in computer science or similar.

Important skills for this position:

- Android application development
- Android NDK development
- OpenGL rendering
- Network communication
- Working in Linux environment
- Agile development mind-set

Good to have skills:

- Windows 10 UWP development
- iOS application development
- Full stack web development, Node.js – React/Redux

We expect an individual who sees a challenge in working with a high performing team and who has a passion to deliver better-than-expected results. We are looking for an open-minded and humble individual who has a strong belief in his/her skills. In our recruitment, we take great care in finding the right person who contributes and complements our existing team.

For more information about the position don't hesitate to contact, Markus Andreasson Manager UX and Applications, email: [markus.andreasson@flatfrog.com](mailto:markus.andreasson@flatfrog.com).
